DETAILED ACTION

Drawings

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “length of lines which are obtained...the curved line of the obtained roll diameters” as set forth in Claim 16, lines 2-5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. On line 2, it is unclear as to what “R” stands for? Further, note that anything in parenthesis will be ignored. Further, what characteristics are being referred to by “minimum” and “maximum” value? On line 4, the term “diameters” is unclear. How can there be plural diameters? Further, how can the diameter be measured in a width value since the diameter is perpendicular to the winding axis?

Art Unit: 3654

Claim 16 is vague and indefinite. Note that anything in parenthesis will be ignored. On line 4, the “curved line of the obtained roll”, on line 6 “the convex portion”, on line 8 “the concave portion”, have no antecedent basis in the claim. On line 5, the phrase “vertically drawing” is unclear since no frame of reference has been set forth. Which direction is the vertical direction?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikuro et al (U.S. Patent No. 4,661,421).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
